

Oil & Gas

GGP Consult have an international oil and gas portfolio of onshore and offshore projects. GGP offer Site Inspection and 3D Laser Scanning services, Brownfield modification, pre-FEED, FEED, Detailed Design and Project Management services for Oil & Gas facilities.

For over 20 years, GGP Consult have been supporting local onshore Oil & Gas projects in the Humber region and worldwide. Years of experience with the national grid gas infrastructure is reflected by our extensive list of international projects.

GGP are Northern Gas and National Grid approved civil/structural contractors. With in-house registered G17 approvers and appraisers we can ensure detailed and code compliant design packages are generated to strict quality standards.

GGP's specialist consultancy support at critical stages of a project ensures value engineering. The Oil & Gas team have experience in a wide range of projects, from £50k local national grid infrastructure, to international \$3bn offshore gas liquefaction and offloading facilities.

GGP Consult stands out with an ability to offer a complete project package including civil design and infrastructure capabilities, G17 design approval/appraisals and project management to support complex downstream Gas projects.

Engineering Services

- Civil Engineering
 - All Civil Design
 - Flood Risk Assessments
 - Site Investigations
 - Drainage
 - Highway Design

Structural Engineering

- All Structural Design
- Structural Assessments
- Seismic Design
- Fabrication Detailing – Tekla

Rail Engineering

- Marine Engineering
- 3D Laser Scanning Surveys
- Topographical Surveys
- CDM Co-ordination
- Expert Witness
- Reverse Engineering

Oil & Gas Services

- Geotechnical Survey
- Seismic Assessment
- Environmental Impact Assessment
- Feasibility Study
- Project Management
- Budget/Schedule
- Pre-FEED & FEED
- Detailed Design
- G17 Approval/Appraisal
- Fabrication Drawings
- Inspection/Survey
- Brownfield Modification
- Decommissioning/Retrofit Services
- Containment
