

## NGN AGI NEW BUILD, GREATHAM

CLIENT – Northern Gas Networks  
CONTRACTOR – Rayden Engineering LTD  
CONTRACT VALUE – £2M  
PROJECT DATE – 2011

GGP Consult provided Civil and Structural Engineering services to Northern Gas Networks for the NGN AGI New Build Project, in Greatham (UK).

GGP are Northern Gas and National Grid approved Civil/Structural contractors. All designs are carried out to meet the requirements of the G17 process, we have in-house registered G17 approvers and appraisers, enabling us to produce compliant multidiscipline designs.

The project involved a new HP to MP pressure reduction installation at Marsh House Lane, Greatham and the diversion of an existing Canvey Island 12” feeder pipeline some 150m from its original position.

The scope of the works included all civils, roadway, soakaway, planing, site survey and geotechnical investigation.

The project was completed in December 2011. This is one of a number of Northern Gas Networks installations that GGP Consult have completed.
