

Health

GGP Consult have considerable experience in the Health sector working on a wide range of projects from hospital refurbishments to new purpose built health centres.

GGP have played a major part in the development of Hull's healthcare provisions for the 21st century. Offering civil and structural design services in the improvement of new GP practices, community health and social care services, pharmacies and the city's only private hospital.

Such projects include the new builds of Bransholme and Morrill Street Health Centres in Hull as well as a large extension to The Spire private hospital in Anlaby.

GGP have also been commissioned to provide all civil and structural work for a proposed new build health centre on the old David Lister School site in East Hull.

The East Hull Integrated Community Care centre (Hull ICC) is currently at design stage and is due to start on site late 2016.

This development will significantly improve the health of the local residents whilst alleviating some of the pressure currently placed on the A&E department of the Hull Royal Infirmary in Hull City Centre.

Architectural Services

- Feasibility/Concept Design
- BIM – Building Information Modelling
- Revit 3D Detailing
- 3D Visualisations and Walkthroughs
- Interior Design
- Planning Applications
- Building Regulations Applications
- Detailed Design
- Tender Packages
- Site Supervision
- Budget Costings
- Design and Build Support
- Sustainability

Engineering Services

- Civil Engineering
 - All Civil Design
 - Flood Risk Assessments
 - Site Investigations
 - Drainage
 - Highway Design
- Structural Engineering
 - All Structural Design
 - Structural Assessments
 - Seismic Design
 - Fabrication Detailing – Tekla

- Rail Engineering
- Marine Engineering
- 3D Laser Scanning Surveys
- Topographical Surveys
- CDM Co-ordination
- Expert Witness
- Reverse Engineering
